

I am a listener of Airl and am writing to request that Low Power FM not be allowed to expand their service as it would eliminate and or cause many people to loose their signal. The reason that I feel so passionately about this is because this is no ordinary radio station. This is a station that brings hope to those who have little. For example, suicide is major problem amongst young people and this radio station gives tells them that there is something to live for and someone that does care. Even though I no longer live in a city that provides me with an Airl station to listen to I can tell you that the services that this radio station provides has gotten me through many ruff times and continues to do the same for others. Please do not let the invaluable service that they provide go silent.
